Map Information

This map presents an overview of the elevation and administrative districts of Madagascar, which is currently threatened by tropical cyclone Gamede. The approximate storm track of Gamede was obtained from GDACS and the Severe World Weather Center of the WMO. This storm data is intended only to give a general update of the present cyclone and should not be used for emergency response decision-making. The depiction and use of boundaries, geographic names and related data shown here are not warranted to be error-free nor do they imply official endorsement or acceptance by the United Nations. This map was produced by the United Nations Institute for Training and Research (UNITAR) Operational Satellite Applications Programme (UNOSAT). UNOSAT provides satellite imagery and related geographic information to UN humanitarian and development agencies and their implementing partners.
