

Praia de Jaguaribe (Brazil)

Users Rating 3/5: ★★☆☆☆

Type: **beach**

Reliability: **inconsistent**

Best Swell: **S**

Offshore Wind: **NW**

Praia de Jaguaribe in Bahia - Norte is an exposed beach break that only works once in a while. Winter is the optimum time of year for surfing here. Works best in offshore winds from the northwest and there is no shelter here from cross shore breezes. Most of the surf here comes from groundswells and the ideal swell direction is from the south. The beach break offers both left and right hand waves. When it's working here, it can get crowded.
