IGNORE THE SMALLER FIGURES of any grid number; THESE ARE FOR FINDING the full coordinates. USE ONLY the LARGER FIGURES of the GRID NUMBER; THESE ARE FOR FINDING the full coordinates. example: 6430000			1. Read letters identifying 100,000 meter square to which the point is located. 2. Locate first VERTICAL grid line to the LEFT of the point and read LARGE figure labeling the line either in the top or bottom margin, or on the line itself. Estimate tenths from grid line to point. 3. Locate first HORIZONTAL grid line BELOW point and read LARGE figure labeling the line either in the left or right margin, or on the line itself. Estimate tenths from grid line to point.
